

Changes in product portfolio

Starting from May 2011 we'll introduce some changes to our production range.

Following compressors won't be anymore produced:

C 2 12 Y C 3 12 Y

No Replacement

Q 4 19.1 Y

Proposed alternative : Q 4 20.1 Y or Q 4 21.1

Q 5 19.1 Y

Proposed alternative : Q 5 21.1 Y

S 7 39 Y

Proposed alternative : S 8 42 Y

S 10 39 Y

Proposed alternative : S 12 42 Y

S 10 51 Y

Proposed alternative : S 10 52 Y

S 15 51 Y

Proposed alternative : S 15 52 Y

Technical assistance and spare parts are ensured for all the dismissed compressors

New Q and S compressor models are perfectly interchangeable, as concerns dimensions, with the previous models and have, in general, slightly higher refrigerating capacity and better COP values.

Moreover we added in our product portfolio the following two bigger 4 cylinders compressors:

V 25 103 Y V 35 103 Y

Capacities and dimensions are available on Frascold Software and on new catalogue. Catalogue related to condensing units assembled with above mentioned compressors will be shortly updated.

Our commercial department or our customer service department are at your disposal for any clarification you may need.

Best regards
